For more information  
contact your local  
Branch leader.

Closer collaboration between members of the Vincentian Family is an identified strategic priority for the majority of religious congregations, lay associations and organizations who are part of the Vincentian tradition.

The Vincentian Family Collaborative Action Program is the first initiative of its kind offering theoretical and practical training on how different members of the Vincentian Family can work more effectively together at a Global, Regional and Local level.

As a result of this program participants will :

- \* appreciate the world wide Vincentian Family's potential to help people and communities emerge from poverty.
- \* become familiar with the Vincentian roots and tradition of collaboration.
- \* through practical modules examine different models of collaboration.
- \* learn how to motivate others to come together to plan new initiatives and promote Systemic Change.
- \* appreciate that collaboration and Systemic Change are ongoing processes of conversion.
